# It's Easy Being Green on Earth Day

Memorial City is committed to improving the environment by implementing recycling programs and developing environmentally-friendly new buildings, like The Treehouse Memorial City, the U.S. Green Building Council's highest-rated LEED building in Texas.

## 10

### Easy Ways to Go Green

Small actions can create big change — especially when it comes to the environment:

- 1. Change a light bulb:** Installing a compact fluorescent bulb (CFL) is the quickest, easiest way to save energy — and money.
- 2. Unplug things that glow:** Anything that has an LED even after you turn it off continues to draw power (that you pay for).
- 3. Recycle your electronics:** Last year, Americans tossed out a whopping 5.5 billion pounds of electronics.
- 4. Audit your energy:** It's easier to save energy when you know exactly how much and where you're using it.
- 5. Support local farmers:** Typical grocery store produce travels nearly 1,500 miles before it ends up on your plate.
- 6. Fix that drip:** We each use about 100 gallons of water a day, enough to fill 1,600 glasses.
- 7. Let your grass grow:** Spending less time tending to your lawn actually makes it greener — in every sense of the word.
- 8. Look for the label:** When it's time to replace a household appliance, choose a product with an Energy Star label.
- 9. Do full loads:** Whenever you wash just a few clothes or dishes at a time rather than waiting for a full load to accumulate, you're wasting water, power, and money.
- 10. Work the critters:** Your backyard ecosystem is as intricate as any wild patch of land, and it pays in many ways to enlist its creatures on your side.
