**Healthy Heart Tips from Memorial Hermann Memorial City**

**Know the Symptoms of a Heart Attack**

Chest pain may be the most well-known symptom of a heart attack—but it's not the only one. Someone has a heart attack every 40 seconds in the United States and the signs can vary between men and women.

*"Recent studies suggest that women are more likely to describe feelings of shortness of breath, upper back pressure, and dizziness. It is imperative that women who are at high risk of having a heart attack know the other symptoms and seek medical care if they believe they're having a heart attack,"* said Razvan Dadu, MD, an interventional cardiologist affiliated with Memorial Hermann Memorial City Medical Center.

For more information on heart health and treatment options available at Memorial Hermann Heart & Vascular Institute-Memorial City, visit [heart.memorialhermann.org](http://heart.memorialhermann.org)
