American Heart Association®

Support Women's Heart Health by Wearing Red!

The American Heart Association created National Wear Red Day on the first Friday in February to raise awareness of the risk of heart disease and stroke in women. Memorial Hermann is proud to support this national initiative and encourages the community to wear red on Friday, Feb. 4, and take charge of their heart health. According to the American Heart Association, heart disease is the No. 1 killer of women, causing one in three deaths each year. Cardiovascular diseases do not affect all women alike, and the warning signs for women are different than for men.

Show your support by wearing red on Feb. 4 and raising awareness for women's heart health. Together, we can help save women's lives.
